TESTIMONIALS

"It works fantastic! My dad was able to go out and pick up a snowblower by himself, no ramps or pushing needed."

– Kirk, All & Awill Repair

"Safety is a priority with everything we do, For us the LiftGator is really a no brainer."

– Dave, Bay Area Rapid Transit

"While working alone, unloading material and tools from my truck was always a concern. With a LiftGator, I don't have to worry."

– Thomas, Ramirez Custom Construction

"I am able to deliver fertilizer to our customers right when they need it, without having to schedule a delivery truck."

– Keith, Watson Ag Services

LIFTGATOR XTR

The LiftGator XTR is ideal for fleet and professional use. This 1,200 lbs. capacity removable liftgate features a self contained battery system allowing the LiftGator XTR to be attached to any truck at any time. This makes the XTR an optimal solution for users with multiple trucks. Over 20 lifts can be completed from a single charge, and the LiftGator XTR can easily be recharged from a truck's 7-pin trailer connector or a 110v wall outlet.

FREQUENTLY ASKED QUESTIONS

How much can I lift on a LiftGator?

A LiftGator XTR is capable of lifting up to 1200lbs on a 48" x 48" platform.

How do I assemble a LiftGator?

A LiftGator ships pre-assembled in three boxes. Final assembly can be completed in less than one hour with standard hand tools.

Where is a LiftGator made?

Each LiftGator is produced by experienced fabricators in Mt. Pleasant, TX. Steel and Aluminum are sourced from American mills to ensure the highest quality.

Which trucks will a LiftGator fit?

A LiftGator will fit any pickup, flatbed, or utility truck with a 2" or 2 ½" hitch receiver. The maximum hitch height is 24" with a maximum bed height of 48".

How does a LiftGator attach to the truck?

A LiftGator is simply rolled to the back of the truck on the provided wheels, and slid into the hitch receiver. A LiftGator can be easily attached to the truck in less than three minutes.
